As new economic challenges arise, energy companies are required to optimize their energy consumption and deliver fewer carbon emissions through process analysis and optimization.

We use simulation as the preferred tool that helps optimize and reduce costs in all energy processes, from extraction to transformation.

# Services

*We are focused on delivering optimization products based on safety and economics.*

*Knowing the problem, we bring solutions to the client.*

*Carbon emissions reduction, capture, and sequestration are how energy industry is responding to today's environmental challenges and help them secure their sustainable future, we help secure their place in the future.*

## Optimization

- Process Optimization
- 
- Basic Engineering
- 
- Process simulation
- 
- PHA Analysis support
- 
- Operation Risk analysis
- 
- Environmental impact analysis
- 
- Acid Gas separation system design
- 
- Acid gas Injection
- 
- Permitting support
- 
- Risk analysis
- 
- Feasibility studies
- 
- ISO 14001 ISO 18001 audits review

## Carbon sequestration

- Carbon Capture systems design
- 
- Acid Gas injection wells design
- 
- Acid gas injection wells permitting support
- 
- Carbon sequestration systems design
- 
- Carbon Sequestration Project Management
